DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-21 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-3, 6-12, and 15-21 are rejected under 35 U.S.C. 102(a) as being anticipated by Munks et al. (US6134253).

With respect to claims 1-3, 6-12, and 15-21, Munks show in Fig.1 a laser system for transmitting the beam in a WDM communication system (col.7, l.17-18) comprising a laser 12 for generating a laser beam, a beam splitter 26 a control filter 32 in a control path and a reference filter 34 in a reference path , a monitor device 48 for determining the wavelength characteristics of light transmitted along the reference path and the control path, a wavelength controller 24 for responding to the output of the monitor device 48 to control the laser medium, and an optical waveguide for transmitting the laser beam (col.7, l.4).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-5 and 13-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Munks et al. (US6134253) in view of Rakuljic et al. (US5691989).

With respect to claims 4 and 13, Munks disclose all limitations of the claims except for a servo system. Rakuljic disclose a servo system (col.13, l.15-16). For the benefit of controlling the laser, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Munks a servo system as taught by Rakuljic.

With respect to claims 5 and 14, Rakuljic disclose the etalons (col.3, l.34-37).
